

Developer Experience and GitOps Workflows

Version 1, 2026-06-16

Introduction

Welcome to this quick course on the ***Foundations: Developer Experience and GitOps Workflows***. This course is the **first** in a series of **six** courses about **Application Platform Delivery**:

- Foundations: Developer Experience and GitOps Workflows (*This course*)
- [Module 2](#)

What's in this course?

- This course is designed to implement its features, focusing on different user roles:
 - **Platform Engineer**:
 - **Application Developer**:

Duration: 2 hours

Contributors

The PTL team acknowledges the valuable contributions of the following Red Hat associates:

- .. (SME)
- .. (SME)
- Yogita Soni (Content Architect)
- Anna Swicegood (Learning Product Manager)

Objectives

On completing this course, you should be able to:

- ...

Prerequisites

This course assumes that you have the following prior experience:

1. [Red Hat OpenShift Container Platform \(OCP\) Technical Overview](#) or Kubernetes Basics

Lab Environment

This classroom does **NOT** have Red Hat Connectivity Link (RHCL) pre-installed. You install and configure a RHCL in this course, and then continue for upcoming lab sections.

Click the [RHDP](#) link above, log in to RHDP, and click **Order** to request a new [AWS with OpenShift Open Environment](#). On the order page for the catalog item, do the following:

- **Activity:** Select **Practice/Enablement**
- **Purpose:** Select **Learning about the Product**
- **Salesforce ID:** If you have an opportunity ID, enter it into this field, otherwise select **Project**, and then enter "Learning about RHCL" in the text field. You will see a warning message that a Salesforce ID is required, but you can safely ignore it.
- **Features:** Select **Enable Let's Encrypt**
- **Region:** Select the AWS region closest to your location
- **User count:** **1**
- **Control Plane Count:** **1**
- **OpenShift Version:** **4.16**
- **Control Plane Instance Type:** **m6a.4xlarge**
- Select the checkbox at the bottom of the page to confirm that lab costs will be charged to your cost center, and click **Order**.
- You can refer below image to confirm the lab settings.

[labenv] | *labenv.png*

The lab environment will take an hour to provision. You can check the status and details of the OpenShift cluster from the **Services** page of RHDP. The classroom is available for 48 hours initially. You can extend the duration of classroom availability by clicking **Help > Get Technical Help** in RHDP, and then requesting an extension by opening a ServiceNow ticket with the RHDP team.

What's in this break-fix?

In this break-fix:

Type of issue:

FIXME: Describe an issue type/category that this specific issue falls into, like, "A Red Hat Enterprise Linux 7 system won't boot after a kernel update." Save issue-specific details for the break-fix scenario page.

What you should already know:

FIXME: This training assumes that you are a Red Hat Certified System Administrator (RHCSA) or have equivalent experience administrating Red Hat Enterprise Linux 7 or 8. FIXME - update this as needed

How break-fix training works:

1. Challenge yourself in the break-fix activity. It describes a problem scenario that's simulated in the lab environment where you can investigate and solve the problem.
2. Follow up with the guided solution:
 - a. If you weren't able to solve the problem on your own, read and follow the instructions in the Guided Solution to complete this training.
 - b. If you were successful in solving the problem, read the solution for useful tips you can apply when solving similar problems.

Break-fix activity

This section presents a scenario based on a real customer issue.

1. Read the scenario and success criteria.
2. Follow any instructions provided for setting up your lab environment.
3. Resolve the issue as simulated in your lab environment.
4. After resolving the issue, run the grading script and submit the completion code as prompted.

You must successfully complete this section to receive a passing grade for this module.

If you exhaust your experience and resources, and you're unable to solve the issue on your own, use the guided solution to step through one possible solution, with tips for addressing similar issues.

Check your work

Follow below steps in the lab to check your work

FIXME: Add the instructions to be followed in the lab environment to make sure the problem has been resolved. You may chose to remove this block if grading script is provided in the lab to check the work.

Check your work using the grading script

After you have resolved the issue and met the success criteria, login to **FIXME** system as **FIXME** user and run the grading script as shown here to check your work:

```
break-fix-script grade
```

Sample output

```
[root@classroom ~]# break-fix-script grade
Initiating break-fix-script with option grade
Grading. Please wait.
Success.
COMPLETION CODE: <check your output for this value>
Completed break-fix-script with option grade successfully
```

FIXME: Remove the below block if no grading script is provided to check the work in the break-fix activity. In this case make sure you use the above block to provide step-by-step instructions learner can follow to check their work.

Submit the completion code

Skip this if not applicable for you.

- For RedHat internal audience: Submit that completion code [here](#) to receive a grade for this training
- For RedHat partners: Submit that completion code [here](#) to receive a grade for this training

FIXME: Change the links in the above lines to the link for appropriate audience specific LMS where learner can provide completion code. Remove this block if submitting completion is not applicable.

Guided solution

This section presents a guided solution to the break-fix activity.

Use this section to:

Learn one possible path to resolving the issue.

Get some tips for investigating and resolving similar issues.

If you're still stuck after exhausting your expertise and resources on the break-fix activity:

Use this solution to complete the activity. Check your work when you finish to receive a grade for this activity.

The steps detailed in these solution pages are optional. They provide additional guidance for those struggling with the break-fix activity. We encourage you to only use these pages if you are completely stuck in solving the issue

Guided solution (page 1 of 2)

FIXME: Provide step-by-step instructions here to resolve the issue.

Guided solution (page 2 of 2)

FIXME: Provide step-by-step instructions here to resolve the issue.
